

I urge you not to replace FM translators with LPFM. I would lose the only radio signal my family listens to - family friendly programming on KLOVE. Your proposal would affect hundreds of thousands of listeners who are connected by this national broadcast. Every year I am concerned that my station may not receive the amount of funding necessary - now I fear that regardless of funding, I may lose the only decent radio signal I can get in my area, which does not broadcast filth such as Howard Stern, among others. Please don't take away the only station I allow my children to listen to!
